Summary: Data Analyst with 2+ years of analytics and research experience across gaming and public health. Analyzed millions of customer transactions using SQL and R for customer segmentation, KPI reporting, workforce planning, pricing, and revenue analysis. Led statistical analysis across three UC San Diego research projects using regression, longitudinal analysis, and causal inference to support data-driven decision-making.

EDUCATION

University of California, San Diego M.S. in Biostatistics GPA: 3.7	09/2024 – 03/2026
University of California, Davis B.S. in Statistics GPA: 3.4	09/2021 – 06/2023

TECHNICAL SKILLS

-
- **Programming:** SQL, Python (pandas, NumPy, scikit-learn, statsmodels), R (tidyverse, ggplot2), Excel
 - **Data Analysis:** Data Cleaning, Data Validation, Exploratory Data Analysis, KPI Reporting, Dashboard Reporting, Data Visualization
 - **Statistical Methods:** A/B Testing, Causal Inference, Regression Analysis, Logistic Regression, Predictive Modeling, Longitudinal Analysis, GEE, Mixed-Effects Models, Hypothesis Testing
 - **Languages:** Chinese (Native), English (Native)

EXPERIENCE

University of California, San Diego

Research Data Analyst

09/2024 - Present

- Cleaned, validated, and analyzed data from 180 households, 524 clinical screening records, and 660 patients across multiple study periods to support program evaluation and health outcome analysis.
- Built regression and longitudinal models to evaluate program outcomes, identify high-risk populations, and assess changes in health outcomes over time.
- Used causal inference techniques, including inverse probability weighting and sensitivity analysis, to evaluate improved cookstove adoption; identified 28%–38% lower pollutant levels and informed program planning and resource allocation.

- Identified high-risk population groups for undiagnosed eye disease, including a subgroup with 41.7% exam-positive prevalence and 70.0% previously unreported cases, helping prioritize targeted outreach and screening resources.
- Found patients with asthma had 2.3 times higher odds of respiratory symptoms during heatwaves, providing evidence to support risk mitigation and care planning.

Galaxy Entertainment

TG Analysis Analyst

08/2023 - 09/2023

- Analyzed millions of gaming transactions using SQL and R to segment player behavior, track revenue KPIs, and identify revenue trends across gaming segments.
- Built statistical models and KPI analyses to compare revenue performance across gaming products and customer segments.
- Produced daily transaction reports across 3 casinos and 11 operating areas, with analyses used for workforce planning, pricing adjustments, and revenue management.

PUBLICATIONS, MANUSCRIPTS & CONFERENCE PRESENTATIONS

- Makahleh, S.; Al-Harashsheh, M.; **Sit, K.W.**; Hessami, N.; Al-Delaimy, W.K. Heat and dust impacts on health of refugees in Za'atari Camp.
- Arora, P., **Sit, K. W.**, & Al-Delaimy, W. K. (2025). Determinants of concentrations of indoor pollutants in homes in rural India. (**Submitted to Indoor Air**)
- Al-Delaimy, E.; **Sit, K.W.**; **et al.** EYEMOBILE Clinic for detection and prevention of eye diseases in uninsured minorities. (**Submitted**)
- Al-Delaimy, W. K.; **Sit, K. W.**; Arora, P. (2025). Household air pollution by cookstove type and home characteristics. (Manuscript in preparation, statistical analysis completed)
- **Poster Presenter:** *Impacts of Improved Cookstoves on Indoor Pollution and Respiratory Illnesses* (ACE Annual Meeting, Pasadena, CA, Sep 8, 2025). **Authors:** **Sit, K. W.**; Arora, P.; Al-Delaimy, W. K.
- **Poster Presenter:** *EyeMobile Clinic for Detection and Prevention in Elderly Uninsured Minorities* (ACE Annual Meeting, Pasadena, CA, Sep 8, 2025). **Authors:** **Sit, K. W.**; Al-Delaimy, E.; Lian, R.; Ronco, J.; Baxter, S.; Molina, I.

ACADEMIC HONORS & CERTIFICATIONS

- Dean's List || Macau College Grant Award
- Data Wrangling, Analysis, and A/B Testing with SQL
